**Frequency of names of days**

Occurrences per million words (singular forms only)

The figures suggest a strong devotion to the (long) weekend. The most frequently mentioned days are Sunday (93) and Saturday (83), with Friday (53) and Monday (53) following well behind in third and fourth place. The mid-week days of Tuesday (36), Wednesday (44) and Thursday (37) are mentioned still less often, with a slight halfway 'peak' on Wednesday.
